US Army Corps of Engineers — Value to the Nation

Economic Impacts of Total Trip Spending for REND LAKE

The lake report on the previous page summarizes direct and secondary economic effects of visitor expenditures related to onsite and en route travel spending within the 30-mile radius of a Corps lake. These results employed local economic input-output (I-O) models and are aggregations of local effects. The following tables capture purchases made by visitors within the 30-mile radius, amounting to about $79,534,962 in travel related expenses (excluding recreational equipment and durable goods) by Corps lakes visitors.
